

Terms and Conditions

1. Terms of Service

By signing up for LaciCloud you become subject to the following requirements.

1A User Content

LaciCloud will only take down user-generated content if a valid court order is present or if the content matches any of the following and we are aware of it:

- DDOS/IP spoofing attacks
- Terrorism related activities
- Botnets
- Phishing sites
- Any content that promotes violence or hatred towards a specific race, ethnicity, or group
- Spam, viruses
- Scam or fraud
- Underage nudity
- Brute force attacks, packet flood scripts, or SIP scanners
- Illegal pharmaceuticals or substances

We will give you time, a maximum of 3 days, to take down the offending content before suspending your account.

In the case of copyright takedowns, LaciCloud is a **DMCA ignored host**, but it acts under Belgian law, so it must comply with local valid court orders. It is highly unlikely that a company will go through the Belgian legal system just to get a content taken down. We ask that you remain sensible and that you do not breach copyright of smaller entities, such as self-employed bloggers, photographers, or small YouTubers.

2. Privacy Policy

2A. Private Information

LaciCloud has a big focus on privacy. LaciCloud only stores the information you give by signing up and the data you uploaded. It does not store IP address or any other metadata to identify you. It does not

store payment information at all. Access logs are enabled, but we strip all IP addresses from them. No data will be shared with 3rd parties and your data will not be used for analysis. LaciCloud encourages the use of encryption and anonymization software, it does not block any proxies, VPNs, or Tor exit nodes.

Safeguards have been put in place to prevent unlawful searches by law enforcement, such as what happened with cock.li's servers. All law enforcement requests will have to go through the proper legal channel to obtain information from LaciCloud. Since LaciCloud's hard drive is encrypted and must be manually unlocked on boot, a sudden removal will cause the drive's contents to immediately return to its encrypted state due to loss of power. For us to give out information, we need a valid court order. We only take court orders from the state of Belgium.

LaciCloud reserves the right to email users and LaciCloud can see which users with which email addresses have upgraded a tier, since laci@lacidcloud.net is automatically CC'd in any payment emails.

LaciCloud does not scan your files for copyright infringement like Dropbox or other cloud storage services. We do not look at your data.

2B. Cookies

LaciCloud uses 1 cookie for the log-in session, which is then immediately deleted at logout.

3. Limitations

3A. Bandwidth

Upload: 100Mbit

Download: 8Mbit

(We have 100Mbit download and 8Mbit upload, so it gets reversed for you)

Please do not abuse the bandwidth of the LaciCloud Server. An upgrade is planned to proper Business-class internet or VPS.

3B. API

Do not make excessive requests.

4. Legal Policy

4A. Legal

These Terms of Service are subject to change with prior warning by Email. By using LaciCloud, user agrees not to involve LaciCloud in any type of legal action. LaciCloud isn't legally responsible for the contents of the files, websites that are uploaded to LaciCloud by individual users. All files, websites are copyrighted to their respective owners. LaciCloud is not responsible for the content any uploaded files, websites, nor is it in affiliation with any entities that may be represented in the uploaded files, websites. This service is provided as-is.

5. Bug Bounty

5A. Normal Bugs

We authorize you to find any bugs in our site. Obviously you should report it via email.

5B. Security Bugs

We authorize you to find vulnerabilities in our site if you abide by these rules:

😊 You shall notify us of the problem

😊 You shall not cause damage to our system (Like altering the database, replacing files on the server, disfiguring the site)

😊 You shall stay within your own user directory (Do not view the files of others)

You shall be rewarded with FTP space depending on the severity of the bug. DDOS does not constitute a vulnerability, please do not attempt.

Bug Contact: laci@lacicloud.net or using our Contact page (file under 'Feedback')

Thank you for following the terms and conditions laid out in this document!
